RELEVANT PROJECTS:

WeChat

Full Stack chat application

- Developed "WeChat," a chat application with Express backend, MongoDB database, Vite frontend, styled using Tailwind CSS and daisyUI, and enhanced with react-icons, utilizing Thunder Client in VSCode for efficient database management.
- Deployed the website using Netlify and used Git and GitHub for documentation.

QuizLet

Computer based quiz web application

- Created and implemented a dynamic computer science quiz platform utilizing JavaScript for interactive features, JSON for data storage, and API integration for real-time updates.
- Developed user-friendly interfaces for quiz management and participant engagement, enhancing educational experiences through gamified learning modules and detailed performance analytics.

WORK EXPERIENCE:

CodSoft Web Development Internship

Web Developer | 20 July, 2024 - Present

- Upskilled by learning about the MERN Tech stack.
- Developed and designed web projects and deployed them using github.

SKILLS:

Languages : C/C++, JavaScript, HTML+CSS

Frameworks: ReactJS

Tools: WordPress, Canva, VSCode, Git and GitHub, Replit, Netlify

Soft skills: Problem Solving, Communication, Leadership

COMMUNITY EXPERIENCES:

IEEE Computer Society | Secretary

March 2023

- Managed a community of 500+ students and hosted many technical and non-technical events, where I have sharpened my Communication and speech delivery skills

AlgoZenith Campus Ambassador | Campus Lead

June 2023

- Led the team and collectively managed and organized many technical events for the community
- Got the opportunity to collaborate and network with students on different campuses all over India
